

## ETL POL 31 – ENVIRONMENTAL POLICY

**Our Environmental Policy lays down firm standards covering every aspect of Extract Technology's activities.**

### **Principles:**

- Confirm to, and where appropriate, exceed the requirements of all relevant legislation and regulations.
- Design energy efficiency into new products, services and facilities, and manage energy in all areas of the business.
- Complete installations at customer premises with consideration for the environment and in compliance with our customer's own environmental requirements.
- In our efforts to conserve the resources of energy, raw materials, water and other items, we will strive to optimise process efficiency, minimise emissions and reduce waste.
- Promote environmental awareness and responsibilities with all company employees, and include those issues in training programmes throughout the company.
- Recognising the potential local impact of our activities, we will develop open relationships with both authorities and the community, and strive to minimise noise, odours and visual intrusion

**"Within our aim of being a 'World Class' provider of environmental products, we will embrace the principles of sustainable development<sup>(1)</sup> in the manufacture of our products. We will achieve this goal through continuous improvement in environmental performance."**

<sup>(1)</sup> Sustainable development  
*"The achievement of business success for today's generation without compromising the quality of life and aspirations of tomorrow's"*

**Signed:**

**Alan Wainwright  
General Manager**
