

Surepharm Improves Operations

Specialist contract manufacturer of healthcare and related products, Surepharm Services Ltd, produces coated and uncoated tablets in a variety of shapes and sizes for a growing international customer-base.

Based at Burton-on-Trent Staffordshire, UK, Surepharm has an excellent production facility together with pilot plant capabilities for formulation development and pre-production trials.

Due to the continued growth in production, Surepharm required additional systems and equipment to streamline its processes.

Central to this upgrade was the requirement for a weighing system in their dispensary to continually monitor the levels of raw materials in stock, and to upload the data to their own formulation system.

...contd...

...continued...

The solution was to have two Extract Technology Downflow Dispensing Booths (each 2.5m wide and in stainless steel) that offer the operators the safety of handling the powdered products without the risk of the harmful dusts entering their breathing zone, allied to a Mettler Toledo weighing system that provides Surepharm with the weighing accuracy required, and the ability to upload data, thus giving them complete control of their stock system.

Ends...

Extract Technology of Huddersfield, UK, manufactures Downflow Booths, Isolators and Pack-Off Systems for the pharmaceutical industry. Extract Technology is part of the US-based private investment firm, Insight Equity, which acquired the Walker Group (parent group of CPS, former owners of Extract) on 6th October 2006.
